

Measurement of Greenhouse Gas Emissions for FOURLIS Group companies in Greece

FOURLIS Group proceeded, for the first time, to the measurement of the greenhouse gas (GHG) emissions, for the year 2022, pursuant to obligations arising from the National Climate Law (Law 4936/27.5.2022) for the transition of our country to climate neutrality and the adaptation to climate change.

The measurement, which includes direct (Scope 1) & indirect (Scope 2) Emissions, was carried out for the Group's companies: FOURLIS HOLDINGS S.A, HOUSEMARKET S.A., INTERSPORT ATHLETICS S.A., TRADE LOGISTICS S.A.

The relevant carbon footprint report was submitted to the electronic database implemented and operated by the Natural Environment and Climate Change Agency (O.FY.PE.KA.) <https://necca.gov.gr/>.

GHG Emissions:

Company	GHG Emissions (tCO ₂ e):
FOURLIS HOLDINGS S.A.	226.41
HOUSEMARKET S.A.	10,173.48
INTERSPORT ATHLETICS S.A.	4,457.42
TRADE LOGISTICS S.A..	1,168.57
TOTAL GHG Emissions	16,025.88

The data received an external verification by TUV AUSTRIA, according to the requirements of the **ISO 14064-1:2018** standard.

In the context of achieving the national target of reducing net anthropogenic greenhouse gas emissions by at least 55% by 2030, FOURLIS Group aims to reduce its footprint by implementing energy efficiency measures.
